Evolutionary Astrology focuses on the soul's evolution and its core dynamics for the current life relative to abilities, potential, fears and karmic issues coming from experience of previous lifetimes. It provides insights into "who you are" and "why you are the way you are".

The philosophical basis of Evolutionary Astrology is based on the question: "how could one person be born crippled and another born as a genius, if there is only one incarnation and yet simultaneously a fair, balancing life-principle (God/Goddess) regulating everything?" (Paramahansa Yogananda).

Evolutionary Astrology was inspired by the great Indian master, Swami Sri Yukteswar, the teacher of Paramahansa Yogananda. Yukteswar states that a soul incarnates that moment when the planetary constellations of the planet are in harmony with the karma of that individual soul. Thus, the individual birth horoscope is the symbolic reflection of the dynamics of the unchangeable past that will now be played out in the current incarnation. Why? In order to evolve beyond old, repeated patterns, over-identifications and attachments which have become a hindrance of the ongoing evolution of consciousness. This includes karmic dynamics of a negative nature, but also positive karma relative to talents, potential and abilities. In other words, the dynamics of previous lifetimes will determine the current incarnation's imprint and character in order to overcome old patterns, attachments and fear to evolve consciousness further for the realization of its own divine essence.

From this point of view, the natal chart becomes a vital, virtuous reflection of the whole being. A being that acts and reacts relative to the soul's desires that force us, sooner or later, to leave our old self-limitations and definitions behind, to continuously embrace the greater awareness of our endless consciousness. Metamorphosis and Evolution are the result.

Applying the amazing techniques of systemic Constellation Work to my "astrological toolbox" facilitates the profound release of the energetic burdens and entanglements, as Evolutionary Astrology allows and enables to look into the "DNA of one's soul" and to apply archetypal dynamics and words to release old unresolved dynamics from the past and/or the family's history.

Participants in a Constellation Workshop clarify and release their energetic identifications or entanglements, as Ulrich Bold heralds a place of acceptance, forgiveness and love of what is and what has been. This is especially effective when issues of mistrust, fear or grief are the obstacles to movement. Concrete shifts in your emotionals, energetic and even physical bodies will result in a renewed perspective. Space at Constellation Workshop-weekend is limited, so please, sign-up early to avoid disappointment.
