

Solar Eclipse
November 13th, 2012, at 22.09 GT
on 22°56' Scorpio

During this New Moon on 22°56' Scorpio with the North Node being on 26°03' Scorpio a "fated seed" is planted in the consciousness, which will begin to manifest, when Mars will be on 22°-26° of Aquarius (26th of January 2013), on 22°-26° of Taurus (27th of May 2013) and on 22°-26° of Leo (10th of October 2013). As Scorpio correlates, among other archetypes, with Power, Contracts, Deals, Comittments, interactive Finanzas like loans, morgages and so on, but also with Evolutionary Necessities of overcoming the Old and old attachments that serve/d us as an emotional safty-blanket, in order to experience Metamorphosis into a New, which often is comes hand in hand with inner compression, doubts and resistance (which can be mirrored by a close person on the outside, too), **collectively** we can expect intense changes being "seeded" tonight.

Especially in the areas of banking and financial power - locally and globally - profound changes will be "conceived" tonight and begin to manifest progressively. As Saturn, the ruler of Capricorn, just entered Scorpio beginning of October 2012 and Pluto, the ruler of Scorpio, being in the sign of Capricorn since 2008/9, collectively we experience a special astrological signification, called "reception", which classically stands for the abitliy to make joiices (according to Vedic & Horary Astrology).

Thus the power struggle (Pluto) that began with the crash of Lehman-Brothers (which was also caused by the Bush administration rejecting any help, which would have kept the damage (Pluto) under control (Capricorn)) between governments (Capricorn) and the banks (Scorpio) is now under the evolutionary pressure to make necessary changes (Scorpio) by free joice (reception).

It is the beginning of the last "round of joice" starting with tonight's Solar Ecllipse and continues as long as Saturn will go through Scorpio until December.

If that shall be missed evolutionary necessity will kick us into our, or in nicer words, into the right direction!
Evolution always wins!

Same dynamic applies with tonight's Eclipse regarding global resources – water, air, food, oil and so on – in order to make the joice and steps towards new energies thus survival (Taurus – opposite sign of Scorpio) of species and ourselves.

On an **individual or personal level** especially Scorpio-born do receive that "seed" during this New-Moon & Solar Eclipse, which

first needs to settle into consciousness like a seed in the soil: deep and invisible until the Mars (as stated above) and transiting Saturn will make it grow, bloom and change your world to the better – if you are willing to let go of overdue emotional attachments which served you o n c e, but now they h i n d e r your journey. Therefore especially Scorpio-borns and Scorpio-risings do need extra time for themselves, to embrace the taste of independency, freedom and to experimentally embrace new impulses in order to gain a bit more of the needed self-reliance & self-respect.

If you should have **natal planets on 22°-26°** of Scorpio tonight's Eclipse will put the “seed” there into your personal life. Depending on the nature of that natal planet (i.e. Venus, Mars, etc.) and what house being located in your birth horoscope and what house(s) is ruled by that natal planet, you can be sure that changes regarding the archetypes of that planet, the house it rules and the house it is in are in the making. After the metaphorical shifts in the future you will see that it was for the best for you and your life, as the fallen leaves in Autumn become the rich soil for the flowers in Spring.
